

ONE MOMENT

I loved you before you were born
Before I ever saw your face
Before I held you in my arms
Before I gave you a name

Before I heard your voice
Or saw your first smile
Even before I realized
You were only here for a while

I loved you in every moment
Imagined those we never shared
Your first steps, your first words
Your first lock of hair

As the angels quietly sing
I struggle to understand
Wishing for one more moment
